Office Action dated June 19, 2007

Response to Office Action dated October 19, 2007

## **Listing of the Claims:**

1. (Previously Presented) A lottery bingo system graphically portraying an animated bingo game, comprising: at least one lottery terminal configured to dispense bingo tickets to a player; and a bingo game generator located at a bingo web server including an animation drawing subsystem, wherein the animation drawing subsystem retrieves bingo call video segments corresponding to a sequence of drawn bingo numbers randomly drawn for a bingo game after dispensing of bingo tickets for the bingo game is ended at the at least one lottery terminal, and compiles the bingo call video segments into a bingo video.

- 2. (Original) The lottery bingo system of claim 1, wherein the bingo game video further includes one or more pre-recorded video segments of an announcement of the bingo game result by a real person.
- 3. (Original) The lottery bingo system of claim 1, further comprising a ticket validation module, wherein the drawn bingo numbers are randomly drawn iteratively, and the ticket validation module compares the sequence of drawn bingo numbers to bingo game numbers on a specified ticket to determine matched numbers on the ticket.
- 4. (Original) The lottery bingo system of claim 3, wherein the ticket validation module compares the iterative sequence of drawn bingo numbers to the bingo game numbers on a plurality of tickets to determine winning tickets and a winning sequence of bingo calls.

Response to Office Action dated October 19, 2007

5. (Original) The lottery bingo system of claim 4, wherein the animation drawing subsystem retrieves matched video segments corresponding to the winning sequence of bingo calls which are determined by the ticket validation module and compiles the matched video segments into the bingo game video.

- 6. (Original) The lottery bingo system of claim 3, wherein each bingo ticket is associated with a corresponding ticket identifier, and the ticket validation module stores game data for each ticket, including the ticket identifier and the bingo game numbers for the ticket.
- 7. (Original) The lottery bingo system of claim 1, wherein the bingo game video is published on a web site to which ticket holders connected to participate in a simulated bingo ball game.
- 8. (Previously Presented) A method of conducting an animated lottery bingo game comprising: comparing a sequence of drawn bingo numbers randomly drawn for a bingo game after dispensing of bingo tickets for the bingo game is ended, to bingo game numbers on a plurality of tickets to determine winning tickets and a winning sequence of bingo calls; retrieving matched video segments corresponding to the winning sequence of bingo calls; and compiling, at a bingo web server, the retrieved match video segments into a bingo game video.
- 9. (Original) The method of claim 8, further comprising integrating in the bingo game video one or more pre-recorded video segments of an announcement of the bingo game result by a real person.

Office Action dated June 19, 2007

Response to Office Action dated October 19, 2007

10. (Original) The method of claim 8, further comprising publishing the bingo game video

on a web site to which ticket holders connect to participate in a simulated bingo ball game.

11. (Original) A system, comprising: a processor; and a program storage device readable by

the system, tangibly embodying a program of instructions executable by the processor to perform

the method claimed in claim 8.

12. (Original) A program storage device readable by a machine, tangibly embodying a

program of instructions executable by the machine to perform the method claimed in claim 8.

13. (Cancelled)

14. (Previously Presented) A bingo game generator for a lottery bingo game, comprising an

animation drawing subsystem located at a bingo web server, wherein the animation drawing

subsystem selects bingo call video segments corresponding to a sequence of bingo numbers

randomly drawn for a bingo game, and compiles into a bingo game video the bingo call video

segments along with one or more pre-recorded video segments of an announcement of the bingo

game result by a real person.

15. (Original) The bingo game generator of claim 14, wherein the bingo game video is

published on a web site to which ticket holders connect to participate in a simulated bingo hall

game.

Office Action dated June 19, 2007

Response to Office Action dated October 19, 2007

16. (Original) The bingo game generator of claim 14, wherein the bingo game video further

includes one or more pre-recorded video segments of an announcement of the bingo game result

by a real person.

17. (Original) The bingo game generator of claim 14, further comprising a ticket validation

module, wherein the ticket validation module compares the sequence of drawn bingo numbers to

bingo game numbers on a specified ticket to determine matched numbers on the ticket.

18. (Original) The bingo game generator of claim 17, wherein the ticket validation module

compares the sequence of drawn bingo numbers to the bingo game numbers on a plurality of

tickets to determine winning tickets and a winner sequence of bingo calls.

19. (Original) The bingo game generator of claim 18, wherein the animation drawing

subsystem retrieves matched video segments corresponding to the winning sequence of bingo

calls and compiles the matched video segments into the bingo game video.
